Govt. of Maharashtra Approval No. PEC 2099/53458(269/99)/TS-1 dated 5/7/1999

**Accredited by NAAC with "A" Grade (2015 - 2020)**

Affiliated to Savitribai Phule Pune University

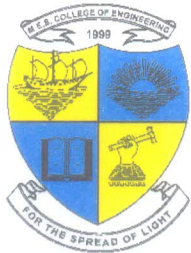

D.T.E Code : EN6281

## Letter of Recommendation

As the Head of the Department of Computer Engineering it gives me immense pleasure to recommend Ms. Mita Shimpi for admission to the **Masters' Degree program in Computer Science** at your esteemed university. I have known Mita since she joined our college in 2012 to pursue her undergraduate degree (Bachelors of Engineering) in Computer Engineering.

The first time I came across the name "Mita Shimpi" was when I heard that a student of the Computer Department had **stood first in the college in their very first semester**. Ever since then, Mita has continued to perform outstandingly in her academics and has maintained her place in the **top 5 percentile students of her batch** throughout the four years of Engineering. I can fully vouch for her not only based on the excellent feedback I regularly received about her from the teaching and non-teaching staff, but also on account of her participation, either voluntarily or through faculty selection, in various co-curricular and extra-curricular activities.

In her 4<sup>th</sup> year, I got to see her potential and passion in the field of Computer Science myself, by being her **group project guide**. Mita was one among the very few students who were granted the **industrial sponsorship** for her final year project. Being her guide, I observed in her a strong drive to give her best and excel in whatever task she pursued. The amount of extensive research that she carried out in addition to the wide range of topics that she could present convincingly for her project selection was truly commendable. Her group selected the cutting edge topic – **Augmented Reality-Based Interactive Tourism (AURBIT)** – which did justice in exhibiting the impressive power of today's computing technology. Even when their project was in its incipient stages, I noted that Mita took up several important responsibilities like maintaining effective communication with the external project guide and myself, drafting and timely submission of journal papers to reputed publications, and other technical tasks like providing a well-formulated project design and implementation plan. Their paper was published in the **International Journal of Soft Computing and Engineering** and they also actively participated in **poster presentations** and **inter-collegiate technical fests**. As a result, Mita's project was greatly appreciated and her group received as high as 95% marks following evaluation.

Mita has been a part of, and in turn has contributed significantly, in several events throughout her college years. Her versatility has always impressed me as she displayed equal calibre in both, her core technical field as well as other extra-curricular activities and soft-skills. In fact, in her final year she was selected unanimously by the college body (staff, Heads of Departments, Principal et al) to be honoured with the prestigious title of **"Ms. MESCOE, 2016"** – short for the college name, "Modern Education Society's College of Engineering". This award is equivalent to the "Student of the year" title and Mita's selection was based on her competency in various physical, technical and intellectual challenges. In addition, she was also a part of the **Student Council** for two consecutive years and was appointed as the **Ladies Representative** of the college.

To summarize, I affirm with pride that Mita is a well-rounded person who will definitely continue to impress everyone in whatever field she pursues in her career. Her persistence, dedication, and her strong intrinsic motivation have brought her a long way in her academic and professional career so far. I am sure that an admission into a prestigious university such as yours will only further fuel her desire and drive to achieve excellence. I therefore highly recommend Mita as a prospective student at your university.

Best Regards,

Dr. (Mrs.) Nuzhat F. Shaikh,

Head of the Department,

Department of Computer Engineering.
