AICTE Approval F.No. 740-89-337(E)/ET/99 dated 2/7/1999

Govt. of Maharashtra Approval No. PEC 2099/53458(269/99)/TS-1 dated 5/7/1999

Accredited by NAAC with "A" Grade (2015 - 2020)

Affiliated to Savitribai Phule Pune University

D.T.E Code : EN6281

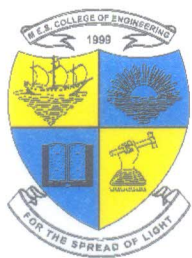

Letter of Recommendation

It is with great pride that I write this letter of recommendation for Ms. Mita Shimpi who is aspiring to pursue the **Masters in Science degree in Computer Science** at your prestigious university. I have known Mita as one of the brightest students of her batch ever since she joined the undergraduate course of Bachelors in Engineering at our college in 2012. Since then, I have had the opportunity to interact with her on a first-hand basis through several theory and laboratory classes related to subjects like Cyber Forensics and Networking.

Mita has always stood out as a **keen observer and a quick learner**, which made her very self-sufficient when it came to academics. For instance, I remember that in her 2nd year of undergraduate studies, she insisted on completing all of her 5-odd complex lab assignments herself, even with the limited time frame available before their evaluation. Mita fared equally well in her exams that semester as she had done in the past three, securing a rank among **the top 5**. What impressed and yet concerned me at the same time during this period though was that, even when time was of the essence, she did not let that compromise the quality of her assignments; she incorporated a time-consuming implementation instead of providing a simple, workable solution.

Mita has shown great alacrity in learning and applying various computing techniques and concepts to practical situations. In the 3rd year, she took upon herself the **task of developing a Messaging Application** in Java based on the Networking concepts taught in class, which was then provided to the rest of the class as an illustration. I particularly observed her adeptness in recognizing hot topics in Computer Science and discussing their vast potential through her seminar on **"Green Computing"** that she presented the same year. Her keen urge to understand engineering concepts beyond theoretical views definitely reflects her strong potential for doing research.

My teaching experience of 17+ years has given me the opportunity to interact with a wide spectrum of students and Mita falls in the top 10 percent of these; she has most certainly left a remarkable impression on my mind with her all-round personality and sharp intellect. Her efficient technical as well as non-technical skillset set her apart from the rest of the crowd. This was evident when she

received job offers from as many as 3 renowned and technologically sound companies during the campus placement drives. Her participation and the talent that she showcased in various activities in college were indeed laudable. Her work during the tech-fests in college as a **member of the "Association of Computer Engineers (ACE)"** club of the Computer Department, her indispensable contribution as the **student co-ordinator** in putting up a splendid programme for the **"National Assessment and Accreditation Council"**, and her role in the Annual event of the college as the **Ladies Representative** and **event organizer**, speak volumes about her leadership skills and team spirit. It was hardly a challenge for us when it came to selecting the Student of the Year in 2016. As a result of her solid performance, Mita was awarded the title of **"Ms. MESCOE – 2016"** (short for Modern Education Society's College of Engineering).

Mita's ability to communicate and mix with others, especially in a cross-cultural setting makes her the perfect candidate for the Master's program. With her merit, dedication and helpfulness, I completely believe in her capabilities to pursue higher education in a leading university such as yours. Based on my own personal experience, I would also go further to recommend her for any teaching or research assistantship positions that may be available. I am positive that she will continue to perform well in all her future endeavours.

Sincerely,

Dr. (Mrs.) Sharmila Kishor Wagh,

Associate Professor,

Department of Computer Engineering.
